DETAILED ACTION

1. Applicant's amendments filed 11/27/06 have been entered.

Allowable Subject Matter

2. Claims 11-23 are allowed over the prior art of record.

Reasons For Allowance

3. The following is an examiner's statement of reasons for allowance: The prior art does not disclose not fairly suggest a method of manufacturing a polycrystalline silicon film by crystallizing a silicon film as described in independent claims 11, 14 and 17.

According to the present invention, while the surface of the polycrystalline silicon film is melted, by the irradiation of the laser beams, with an overlap of the first and the second pulse laser beams, the portion irradiated with the second pulse laser beam becomes amorphous, forming an extremely excellent polycrystalline silicon film in a desired region by scanning. The crystals laterally growing over the entire surface of the irradiated object are allowed to have an identical direction in which the crystals grow. Since an end of the laterally growing portion is melted again and next lateral growth proceeds starting from it, crystal growth becomes substantially continuous, significantly improving crystalline property.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
